

ACKNOWLEDGEMENT

The Department is especially grateful to Ir. Dr. Shamsudin Ab. Latif, Deputy Director General (Development) for taking the initiative to write a series of **Technical Guidance Documents**, some for the use of DOE officers and some for the industries. It is our fervent hope that widespread use of these documents will value-add DOE's enforcement work, as well as industries' practices in pollution control. The final goal is to improve **regulatory compliance** and consequently, achieve a better **environmental quality** for all.
