ITOPF

The International Tanker Owners Pollution Federation (ITOPF) is a non-profit making organisation, involved in all aspects of preparing for and responding to oil spills from tankers. ITOPF's history stretches back to 1968. It was established after the *Torrey Canyon* incident to administer the voluntary compensation agreement, TOVALOP, which assured the adequate and timely payment of compensation to those affected by oil spills. TOVALOP came to an end on 20th February 1997. As a result the membership and funding arrangements of the Federation have now changed. ITOPF now devotes considerable effort to a wide range of technical services, of which the most important is responding to oil spills. ITOPF's small response team is at constant readiness to assist at marine oil spills anywhere in the world. This service is normally undertaken on behalf of our tanker-owner members and their oil pollution insurers (normally one of the P&I Clubs) or at the request of governments or international agencies such as the International Oil Pollution Compensation Fund. Other services we provide include damage assessment, contingency planning, training and inform-

ation. The Federation maintains an extensive library and a number of databases, and produces technical publications and videos.

THE OIL SPILL LIABILITY TRUST FUND:

The Oil Pollution Act authorizes use of the Oil Spill Liability Trust Fund (OSLTF) as a source to fund certain oil removal costs, and damages resulting from a discharge or substantial threat of discharge of oil to navigable waters of the US

The OSLTF is administered by the Coast Guard National Pollution Funds Center (NPFC) and consists of the *Principal Fund* and an *Emergency Fund* component. The Emergency Fund is used to fund removal actions by Federal On-Scene Coordinators, initiate Natural Resource Damage Assessments and provide funding access for immediate removal actions by States. The Principal Fund is used to pay claims and for Congressional appropriations to implement, administer and enforce other OPA requirements. Claims may be submitted for uncompensated removal costs determined

to be consistent with the National Contingency Plan or for certain uncompensated damages, including natural resource damages, if the responsible owners or operators of discharging vessels and facilities do not pay. Oil spill response organizations should consider this funding resource to recover costs associated with removal actions.

OPA also mandates the scope and limits on liability for owners and operators of vessels and facilities from which oil is discharged or poses a substantial threat of discharge. The NPFC administers the certification of financial responsibility (COFR) program for vessel owners and operators. The COFR program is designed to ensure that vessel owners and operators have the financial means to pay removal costs and damages when their vessel discharges oil.

INTERTANKO

INTERTANKO is the International Association of Independent Tanker Owners. The INTERTANKO membership fleet numbers 2,073 tankers with a total tonnage of 176 million tons deadweight. This is equivalent to 75 per cent of independently owned tanker tonnage worldwide. Ownership of this diverse fleet of tankers is spread amongst 270 owners in 45 countries worldwide. The Association also has an associate membership of 296 companies and organisations in 50 countries providing equipment and services to the tanker industry.

INTERTANKO was established in 1971 to represent the interests of independent tanker owners worldwide, and has, as its three central aims, safe ships, clean seas and free competition. With a Secretariat numbering 30 people, the Association maintains a strong proactive stance in its efforts to represent the tanker industry effectively at international, regional, national and local levels. In addition to its headquarters in Oslo, INTERTANKO also has offices in London, Washington, DC and Singapore.
