Dr. Michael A. Champ, Editor-in-Chief
7000 Vagabond Drive
P.O. Box 2439
Falls Church, VA 22042-3934
Website: <http://www.elsevier.nl>

Keyword: Spill

Spill Science & Technology Bulletin is an international, peer-reviewed journal on oil and chemical spill science and technology focusing on the effects and control of discharges of oil, oil products and other hazardous substances. It includes Research papers, Review papers, Viewpoint articles, Technical notes and Technical product news, as well as section for Book Reviews and Announcement of Conferences of general interest to the spill community. Subjects treated are engineering developments, including equipment performance assessments as well as scientific issues, and physical, chemical and biological research findings. Both land and water spill issues are addressed and papers linking science and technology with policy and management matters (including economics) are also considered appropriate. The unique aspect of the journal is its focus on solutions, rather than identification of the impacts of oil and chemical spills, derived through enhancements in basic knowledge and development of new methodologies and advanced technologies.
