

TECHNICAL CONTRIBUTORS

The IAWG gratefully acknowledges the technical contributions made during the course of this project by:

- T. Aalbers** - RIVM, Netherlands
M. Adams - VROM, Netherlands
I. H. Anthonissen - RIVM, Netherlands
J. Atwater - University of British Columbia, Canada
J. Barniske - Umweltbundesamt, Germany
J. Berry - Wheelabrator Environmental Systems Ltd., USA
S. Binner - Vølund, Denmark
R. Boehm - PBI, Netherlands
H. Borrmann - Forschungszentrum Karlsruhe, Germany
J. P. Born - VVAV, Netherlands
R. Braam - PBI, Netherlands
S. Burnley - Energy Technology Support Unit, United Kingdom
D. Chambaz - BUWAL, Switzerland
A. Chamberland - Tiru Inc. (formerly with Montenay Inc.), Canada
W. Chesner - Chesner Engineering, P.C., USA
B. Christensen - Environment Canada
S. Cook - Bermuda Biological Station
R. Comans - ECN, Netherlands
S. Dalager - dk TEKNIK, Denmark
A. Damborg - Danish Water Quality Institute
C. Dent - AEA Technology, United Kingdom
A. M. Fällman - Swedish Geotechnical Institute
A. Finkelstein - Environment Canada
J. Fraser - Wastewater Technology Centre, Canada
M. Gallo - Rutgers University, USA
D. Goetz - University of Hamburg, Germany
J. Gronow - United Kingdom Department of Environment
T. Guest - Montenay Inc., Canada
L. Gullbrand - Swedish National Board for Industrial and Technical Development
G. Hansen - United States Environmental Protection Agency
D. Hay - Environment Canada
S. Hetherington - Compass Environmental Inc., Canada
F. Hoffman - Rutgers University, USA
G. Hoffmann - Umweltbundesamt, Germany
R. Huitric - LA County Dept. of Sanitation, USA
L. Johansson - Swedish Geotechnical Institute
B. Johnke - Umweltbundesamt, Germany
T. Kimura - Kubota Corporation, Japan
J. Kiser - Integrated Waste Services Association, USA
R. Klicius - Environment Canada
O. Knizik - Greater Vancouver Regional District, Canada
M. Knoche - LAB, France
K. Knox - Knox Associates, United Kingdom
T. Kosson - Rutgers University, USA
H. Kruijdenberg - NOVEM, Netherlands
P. Leenders - (formerly with VEABRIN - Netherlands)
G. Luers - Corning Glass Ltd., USA
T. Lundgren - Terratema AB, Sweden
D. Mitchell - AEA Technology (formerly with Warren Spring Laboratory), United Kingdom
K. Öberg - Swedish Environmental Protection Agency
G. Owen - Environment Canada
J. Pappain - Peel Resource Recovery Inc., Canada
J. Pearson - AEA Technology, United Kingdom
A. Petsonk - Swedish Environmental Protection Agency
B. Putnam - International Lead Zinc Research Organization
G. Rigo - Rigo & Rigo Associates, Inc., USA
J. Robert - Energy, Mines & Resources, Canada
F. Roethel - University of New York at Stony Brook, USA
H. Roffman - AWD Technologies, USA
S. Sakai - Kyoto University, Japan
M. Sheil - New Jersey Dept. of Environmental Protection & Energy, USA
B. Simmons - California Board of Health, USA
D. Stämpfli - formerly with EAWAG, Switzerland
J. Stegemann - Wastewater Technology Centre, Canada
L. Stieglitz - Forschungszentrum Karlsruhe, Germany
M. Stringer - Greater Vancouver Regional District, Canada
H. Tejima - Takuma Co., Ltd., Japan
T. Theis - Clarkson University, USA
B. Timm - Swedish Environmental Protection Agency
J. Tsuji - formerly with Environmental Toxicology International Inc., USA
A. van Santen - Energy Technology Support Unit, United Kingdom
J. F. Vicard - LAB, France
J. Vogel - Heidelberger Zement, Germany
H. Vogg - Forschungszentrum Karlsruhe, Germany
S. Waring - AEA Technology, United Kingdom
C. Wiles - National Renewable Energy Laboratory, USA
M. Winka - New Jersey Dept. of Environmental Protection & Energy, USA
J. Wittwer - Environment Canada
D. Wexell - Corning, Inc., USA
W. Wormgoor - TNO, Netherlands

The IAWG also wishes to thank all of the other people not mentioned here, who in their own way assisted us in this endeavour.

A special "thank you" to **Stephen Hetherington** for his patient efforts in revising and reformatting this document.
